

# Developer - Vignesh Elangovan, B.E

Vignesh Elangovan  
Developer

## Current Role and Responsibilities

To formulate business logic according to the requirements

Providing assistance with technical matters to the team

## Summary of the Latest Experience

### Vornado Realty Trust

- In vornado project, involved in creation of Rest API's.
- Efficiently solved Junit test case using advanced Mockito concepts.
- Potentially solved UAT bugs and standardization of codes.

### DEMS

- I developed a dynamic web page using ReactJS that features a responsive navbar for seamless navigation.
- Leveraging API integration, the application seamlessly fetches and displays real-time data, enabling users to perform CRUD (Create, Read, Update, Delete) operations effortlessly.

### Latent View

- Latent View involves the development of an API interface bridging the gap between a bank and SAP BYD.
- This involves creating transaction requests based on client processes, verifying the successful processing of these transactions, and retrieving the corresponding responses.

## Added value for the customer

- Experience in core java ,java script
- Experience in HTML,CSS and React JS
- Rest API
- Oracle Database

## Applications

- Eclipse IDE
- Postman
- Visual studio code
- Soap UI

## Education

- B.E. – Mechatronics Engineering
- PG Diploma in Mechanical Engineering
