

# Developer – Afsal Suban, B.E

**Afsal Suban**  
Developer

## Skills

Html  
CSS  
JavaScript  
Core Java  
AngularJS  
ReactJS  
Problem Solving

## Current Role and Responsibilities

To develop the business logics based on requirement

Providing technical support to the team.

## Summary of the Latest Experience

### Engie – Outgoing Payment File

Generated a proxy for the Standard WSDL and created a request method for the standard web service. Afterward, I encrypted the file using OpenSSL and then moved the files to the SFTP server.

### Spectracom

Material Integration and Product Design Integration, along with integration between the product life cycle system and SAP By Design.

### HMS-NVL Integration

Generated a proxy for the delivery confirmation WSDL, created the tag value, and read the file from the SFTP server.

### Web Development Knowledge

Seamlessly integrated an Employee Details web page with CRUD operations, connecting AngularJS frontend to a MySQL database via Java backend.

Generated responses from the OData API using Reactjs from backend to frontend to circumvent CORS issues.

Created frontend and integrated backend for Customer Data retrieval from BYD server using AngularJS and Java.

### Artificial Intelligence

AI & ML Developer specializing in Face Recognition Systems, adept at training models using Jupyter Notebook, leveraging Python for AI development, implementing Rest APIs, and possessing expertise in AI applications within ChatGPT.

## Added value for the customer

- Python
- OOps
- Ms-Office
- SQL
- Cloud Computing
- Data Structures
- Editing

## Applications

- Visual Studio code
- Eclipse IDE
- Spring Tool Suite
- Rest API
- SOAP UI
- PyCharm

## Education

- B.E – Computer Science and Engineering
