Backend

Core Java
ABAP

Frontend

HTML & CSS
Basics of React JS
UI/UX design

Current Role and Responsibilities

Understanding the requirement and develop the business logics, in the specified timeline.

Summary of the Latest Experience

Engie – Outgoing Payment File

Generated a proxy for the Standard WSDL and created a request method for the standard web service. Afterward, I encrypted the file using OpenSSL and then moved the files to the SFTP server.

HMS :

Generated proxy for payment attachment file and outgoing payment file.
Created Request and response for read operation using outgoing payment file.

HMS-NVL Integration

Generated a proxy for the delivery confirmation WSDL, created the tag value, and read the file from the SFTP server.

Web Development Knowledge

I created an employee details web page with CRUD operations using React JS and connected it to a MySQL database on the backend using Java in the Spring Boot framework.

UI/UX Design :

Learnt the basics of screen designing using figma.

Added value for the customer

- C programming
- SQL
- OOPS
- Fluent in English native speaker

Applications

- Java Eclipse
- Postman
- SoapUI
- Spring Boot
- Visual Studio Code

Education

- B.E. –Computer Science and Engineering
